

James Hardie Siding and Trim Quality Checklist

Good Guys Contracting strict building standards will ensure your James Hardie Siding will be installed with Quality and Value that will surpass all others. The following details are just a few of the important details on our Quality Checklist that make James Hardie Siding installed by our "in-house" team stand apart from the rest.

Nails and Fasteners

We only use the top quality stainless steel fasteners. We never accept rust coming through any planks or trim.

Hidden Fastener System

Ask us about the optional hidden fastener system approved by hardie on for all trim. Provides an aesthetic look not available with any other product lines.

Custom Flashing

We install custom bent "color-coded" flashing on your entire job. Provides a thought through clean look.

Certified to install James Hardie Siding

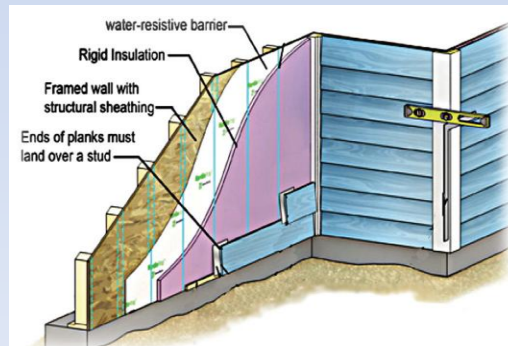

James Hardie recommends Good Guys Contracting for professional installation of all their exterior products. We have been selected to have the "preferred" status by James Hardie for the last 4 years.

Insulation

Ask us about our many insulation options. Unlike our competition we have many options to insulate an old house from the exterior without damaging interior walls.

Hardie-Wrap Weather Barrier

Hardie-Wrap provides the utmost in moisture protection and breathability and surpasses all other wrap products.

Proper Installation Process
